Subject: (External):Sierra Club position statement on spent nuclear fuel storage

Dear CEP leaders:

In the context of tomorrow's significant gathering, the Sierra Club Angeles Chapter has developed the attached statement. Feel free to reference it during any of the discussions. Also, we request that Manuel include this in the next CEP informational distribution.

Regards,

Glenn Pascall

Hello Ms. Borchmann,

Thank you for your email.  
All CEP meeting are live streamed on [www.SONGScommunity.com](http://www.SONGScommunity.com) so you will be able to view the meeting from any location. Shortly after the meeting date we also post the meeting videos on the same site, which you can access at any time.

Thank you,

Message: 6/22/16 Meeting Follow-up, 2 Questions:

- 1) Can risk of region radiation exposure (population and environmental)be prioritized for the timetable of removal of fuel from San Onofre ahead of other plants in the nation (versus the current method of prioritizing the removal of spent fuel from a plant in the nation that has the oldest fuel first)?
- 2) Can security and surveillance be contracted for San Onofre, especially against terrorist or subversive events?

Thank you for your consideration.

Hello P A Miller,  
Thank you for your email.  
This email is in response to the questions you emailed us.

In response to your first question: Can risk of region radiation exposure (population and environmental) be prioritized for the timetable of removal of fuel from San Onofre ahead of other plants in the nation (versus the current method of prioritizing the removal of spent fuel from a plant in the nation that has the oldest fuel first)?

Response: The order and priority for which the US Department of Energy (DOE) would remove fuel from shutdown nuclear stations has not been finalized. The DOE recommends for the public to voice any opinions, questions and concerns through the DOE Consent Based Siting process by emailing them at [consentbasedsiting@hq.doe.gov](mailto:consentbasedsiting@hq.doe.gov).

Your second question: Can security and surveillance be contracted for San Onofre, especially against terrorist or subversive events?

Response: SCE provides for the security of SONGS in accordance with Nuclear Regulatory Commission (NRC) requirements. SCE currently does not have any plans to contract out its fundamental security and surveillance activities to a third-party contractor.

Thank you for your interest in the decommissioning of San Onofre.  
If you have any further questions or comments please do not hesitate to contact us via phone at our Decommissioning Hotline (800)332-3216 or email at [nuccomm@songs.sce.com](mailto:nuccomm@songs.sce.com).

State: CA  
Message: TO CEP

I attended the regular CEP meeting for the first time on June 22, 2016. I was impressed with the speakers and the outcome of the meeting.

I did detect a lack of confidence in the owners/managers, however, which gives rise to the following request:

How do I access the inspection and testing program for the stored AREVA canisters and the resulting documentation?

Thank you for your assistance-  
Don Orcutt

---

*Response*

---

Hello Mr. Don,  
Thank you for your email and attendance at the June CEP meeting.

**Compilation of Recent CEP Communications  
06/20/2016 to 09/01/2016**

Information related to the inspection, testing and resulting documentation for the AREVA canisters at San Onofre can be found on the Nuclear Regulatory Commission (NRC) website at [www.NRC.gov](http://www.NRC.gov). Attached is a link to the Certificate of Compliance License, which provides the inspection and testing program requirements for the AREVA canisters: <http://www.nrc.gov/docs/ML0515/ML051520118.pdf>.

Thank you for your interest in the decommissioning of San Onofre.

If you have any further questions or comments please do not hesitate to contact us via phone at our Decommissioning Hotline (800)332-3216 or email at [nuccomm@songs.sce.com](mailto:nuccomm@songs.sce.com).

Subject: FYI - CEQA: SLC Notice of Preparation of EIR and Public Scoping Meetings

CEP Members,

Today, the California State Lands Commission (SLC) issued a Notice of Preparation (NOP) of a Draft Environmental Impact Report (EIR) and notice of public scoping meetings for San Onofre. The NOP and scoping meetings are part of the SLC's California Environmental Quality Act (CEQA) process for SONGS. Attached is the NOP. The notice also is available on www.slc.ca.gov at CEQA Updates. Written comments on the NOP are due to the SLC by August 15.

Pasted here are details on the public scoping meetings:

California State Lands Commission
Public Scoping Meeting #1
Tuesday, July 26, 2016
5pm – Open House
6pm – Start of Meeting
Oceanside City Hall, Civic Center Library
300 North Coast Highway
Oceanside, CA 92054

California State Lands Commission
Public Scoping Meeting #2
Wednesday, July 27, 2016
12pm – Open House

**Compilation of Recent CEP Communications
06/20/2016 to 09/01/2016**

1pm – Start of Meeting
San Clemente High School, Theater
700 Avenida Pico
San Clemente, CA 92673

The scoping meetings are being added to the SONGScommunity.com home page under “upcoming events” along with a link to the SLC site for further information on the CEQA process.

Best,

Manuel

Subject: FYI: Attached is the 2nd email on MSRs and taking LWR fuel and converting it for use in MSR's to eliminate the need for storing huge volumes of partially spent fuel.

Good Afternoon CEP Members,

Below is an e-mail exchange between CEP Chairman David Victor and CEP Alternate Richard McPherson (back-up to Ted Quinn) regarding work that Richard is doing with respect to is molten salt reactors as a strategy for reducing waste from commercial reactors such as SONGS. Included are two attachments provided for your awareness.

Dear Manuel

Yesterday I had a very helpful telephone call with Richard McPherson (Ted Quinn's alternate on the CEP) and he shared with me some work he is doing on molten salt reactors as a strategy for reducing waste from LWRs such as SONGS. This still seems to be on the horizon, but Idaho National Lab and others are working these fronts. It is an example of the many diverse efforts that will emerge when there are incentives to reduce the volume of spent fuel—something that the CEP has been exploring, of course, through our efforts on consolidated interim storage.

Could you please share this email thread and the two attachments with the CEP for awareness? At our next meeting, Ted may also want to bring this up along with related topics.

Thanks

David

Monday, July 25, 2016

David:

It was good talking to you. As I said, you have done a masterful job *herding cats* on the CEP. Please feel free to share them both as you see fit. It is time we changed our approach in dealing with partially spent fuel from commercial reactors and stimulated the commercial nuclear industry to move

**Compilation of Recent CEP Communications
06/20/2016 to 09/01/2016**

forward before it is too late for the United States to be in the business. Should we fail to do so, American as we know it will be a footnote in history.

Time is working against the United States. What we have been doing in 15-years, we need to do in four years. we have the people and technology; all we need is the freedom and mandate to move out.

Regards,
Richard McPherson
