Subject: New CEP Message

This is an automated email response from Community Engagement Panel Date Sent: 7/15/2015

First Name: Jerry

Last Name: Mirsky

Email address: [REDACTED]

City: San Clemente

State: CA

Message: I'm happy to see Tim Brown from the San Clemente City Council is also sitting on that Board; However, any meeting of CEP should be held in San Clemente, Dana Point or San Juan Capistrano for openers. I believe holding a meeting in Oceanside will exclude most residents from these areas from attending. Further, I personally don't want to hear someone from the Sherrifs Department on how to keep the nuclear waste stored at SanOnfre safe. Especially at this time when the Federal Government, whose ultimately responsible, won't even recognize the word terrorism, makes deals with our enemies, and has no problem [REDACTED] all over the Constitution and our long term allies. I personally consider, with all the evidence, including irresponsible government spending, totally out of Control!

THE LAW REQUIRES THE NUCLEAR WASTE TO BE REMOVED! My position is simple.

Follow the law and get that [REDACTED] out of here. I'm not interested in what local law enforcement is doing to keep the crap safe. They should be opposed to the Federal Government putting this burden on their back and lives. I for one am getting sick and tired of hearing excuse after excuse from all levels of government effectively justifying outright breaking of the law. I know the current President sets a poor example for this position, but our founding Father's put the System we have in place knowing government can never be trusted. Power corrupts and total power corrupts totally. Once those in government are allowed to break the law to meet their ends we are heading for another revolt. I'm 71 and don't need that. Follow the law, and get rid of that nuclear waste. Changing the subject on how the [REDACTED] can be protected feeds the government excuse for breaking the law. I've seen government ham stringing personally several times from local to federal levels, and had the pleasure of working against them and their inherent corruption, which is so incestually infested it's hard to see that the light at the end of the tunnel is not a train (nuclear holocaust).

Get rid of the nuclear waste period! No more excuses, and those in power whose responsibility is to do this should be removed, because they have failed miserably. Further, someone needs to bring sanity to the EPA who is clearly incompetent and part of the problem along with the Nuclear Power Commission.
